SUMMARY

Full-Stack Web Developer ready to tackle any problem with creativity, determination, and an innate curiosity. A full-stack web development bootcamp graduate through UC Berkeley Extension, further developing skills like JavaScript, React, and Node.js through web development positions with Expunge Assist and City Beauty. Continued learning new technologies like TypeScript and PHP through personal and professional projects. Team player always ready to fill the needs of the team to support the project. Excited to solve challenging problems and continue learning.

TECHNICAL SKILLS

Languages: JavaScript ES6+, CSS3, HTML5, SQL, NoSQL, TypeScript, PHP
Libraries/Frameworks: Express, React, Node.js, bcrypt, JQuery, Bootstrap, Apollo, Handlebars, Sequelize, Mongoose, mysql2, graphQL, Stripe, Material-UI, Tailwind CSS, luxon, Angular
Other: Git, Heroku, MongoDB, MySQL, Webpack, Testing, TDD, Responsive Design, Debugging, Docker, npm, Salesforce, Asana, Jira, APIs, AWS S3

RELEVANT EXPERIENCE

Hack for LA | Remote   Nov '21 – Present
Development Lead - Expunge Assist - *expunge-assist.org*   Mar '23 – Present
Expunge Assist aims to help people in California with criminal records accomplish record clearance, expungement or reduction, and subsequently a second chance as a part of society.
- Organizing with Product Managers and other Team Leads to determine roadmap, upcoming goals, and mission
- Lead Weekly Development meetings to motivate and support volunteers, keep accountability, and update team on project news and roadmap
- Frontend Developer, collaborating remotely across timezones to build an effective application
- Researched and wrote documentation for internal developer processes to improve efficiency
- HTML, CSS, TS, React, Material-UI, Figma, Github Actions

Front-End Developer - Expunge Assist - *expunge-assist.org*   Jan '22 – Mar '23
- Front-end Developer, collaborate remotely with cross-functional teams using a Kanban board, Slack
- Contribute to open-source Expunge Assist repository translating Figma designs into functional Typescript React components and pages
- Build, maintain, and refine responsive React applications to guarantee great user experience through high-quality user interface (UX/UI).
- Building out processes and standards for contributing code, issues, and pull requests to produce high-quality code
- HTML, CSS, TS, React, Material-UI, Figma

Front-End Developer - website - *hackforla.org*   Nov '21 – Jan '22
- Front-end Developer, working remotely across teams to complete design and development issues using a Kanban and continuous integration/continuous delivery (CI/CD) methodology
- Mentor incoming developers in procedures and practices as well as code review
- Contribute to open-source Hack for LA website repository through issue completion, code review, and debugging
- Write documentation for other developers
- HTML, CSS, Docker, Jekyll, Sass, Liquid, gh-pages, Figma

City Beauty | Remote   Apr '22 – Oct '23
Web Developer - *citybeauty.com*   Mar '23 – Oct '23
- Front-end Developer, building pixel-perfect, high quality revenue-generating content on tight deadlines
- Led project to refactor web pages for efficiency in a high-volume e-commerce environment
- Researched and wrote documentation for internal developer processes to improve efficiency
- Experience debugging and reviewing code to create high quality, easy to read code
- HTML, CSS, TS, JavaScript, Angular, SCSS, Bootstrap, Invision, PHP, Wordpress, MySQL, Asana, Jira, APIs, AWS S3

Jr. Web Developer - *citybeauty.com*   Apr '22 - Mar '23
- Front-end Developer, building pixel-perfect, high quality revenue-generating content on tight deadlines
- Effectively collaborate remotely and asynchronously across functional teams using Slack and Asana
- Build, maintain, and refine responsive branded ecommerce website to guarantee great user experience through high-quality user interface (UX/UI)
- Experience debugging, writing and reviewing Pull Requests(PRs) to create high quality, easy to read, easy to scale code
- Quickly and efficiently building iterable and scalable pages to be used for A/B testing
- HTML, CSS, TS, JavaScript, Angular, SCSS, Bootstrap, Invision, PHP, Wordpress, MySQL, Asana, Jira, APIs, AWS S3

PROJECTS

App Tracker
github.com/sydneywalcoff/app-tracker | login: test - password: test | sw-app-tracker.herokuapp.com/
App Tracker is a responsive TypeScript React application to easily track job applications to simplify the job search process.
- Working individually to organize version control system, design, develop, debug, and deploy a full-stack job application tracker to Heroku
- Full Stack Developer with experience working end-to-end focused on building a scalable Mongo database and back-end as well as an intuitive user interface on the front-end for high-quality User Experience (UX/UI)
- Identify and troubleshoot technical problems
- HTML, CSS, TypeScript, Mongoose, Express, React, Node, graphql, Tailwind CSS, luxon

EDUCATION

Certificate, Full Stack Web Development - UC Berkeley Extension, CA
A 24 week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Node Js, MySQL, MongoDB, Express, Handelbars.js & React.

Bachelor of Arts, Economics, and Music: UC Davis, CA
Attained separate degrees in Music and Economics.
